An aerial night photograph of a city, likely Mumbai, India, showing a dense urban landscape with numerous lights from buildings and streets. The city is situated along a coastline, with the lights reflecting on the water in the foreground. The sky is dark blue, and the overall scene is illuminated by the warm glow of city lights.

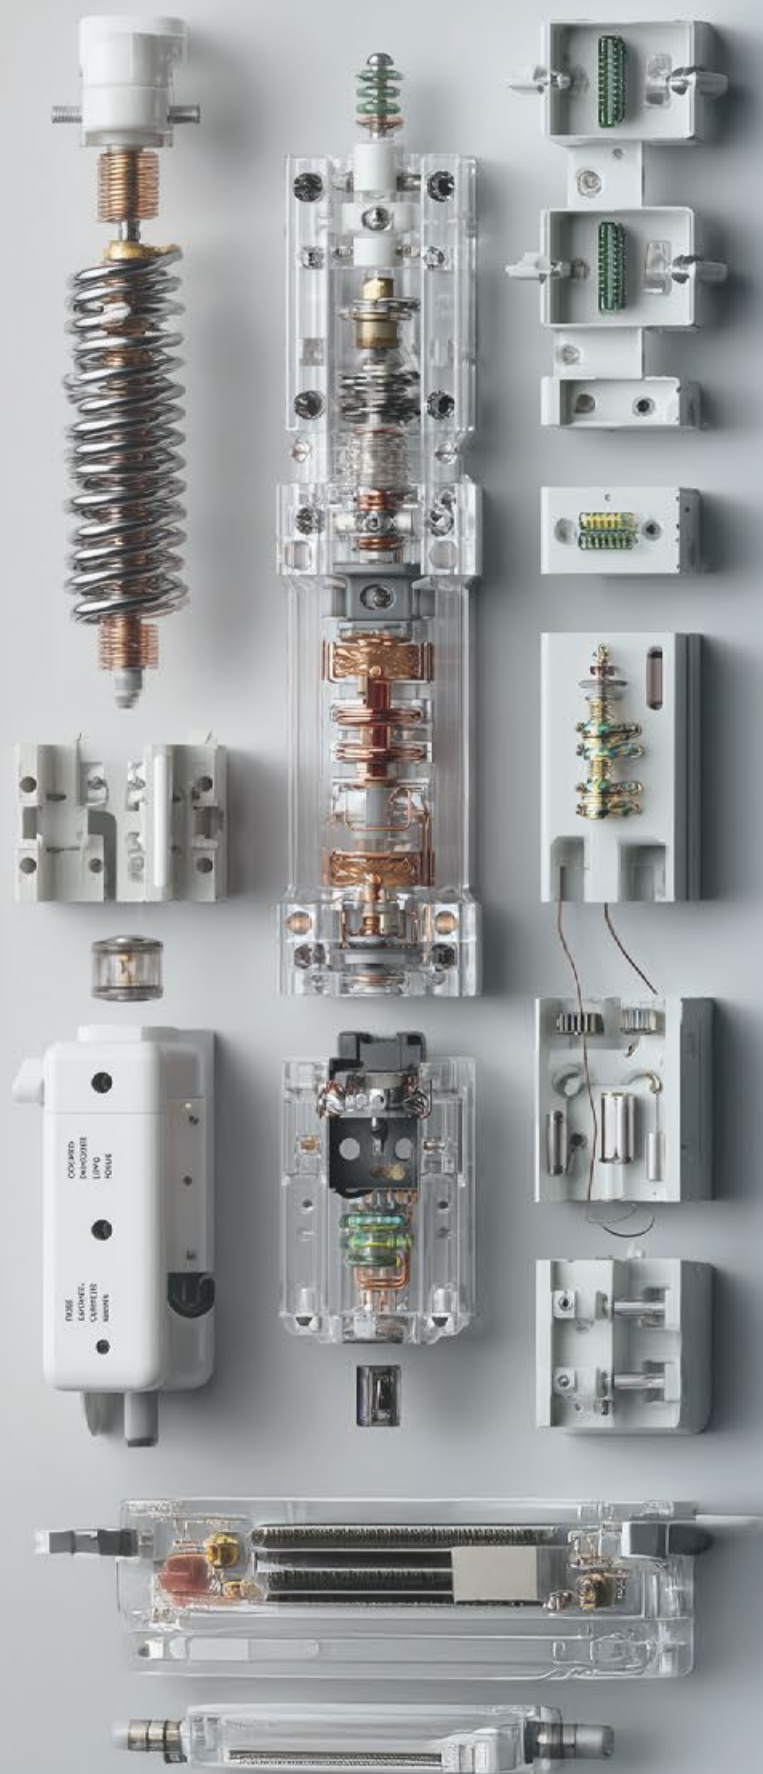

For over 80 years, Bajaj has been a name India trusts.

Established in 1938 by Shri Jamnalal Bajaj, the brand has become an enduring part of every Indian home. It offers a wide range of home appliances, fans, and an extensive portfolio of lighting solutions, including smart products, inverter lights, lamps, battens, decorative lights, outdoor lights, portable lights, and accessories.

In addition to serving millions of households, Bajaj has a strong presence in the B2B segment and exports to numerous international markets, strengthening its global footprint.

Its commitment to innovation and quality has earned global admiration, delivering value-driven products that brighten homes, enhance living spaces, and make everyday life more efficient.

With sustainability at its core, Bajaj continues to shape a better future while upholding its legacy of trust, excellence, and happiness in every household.

HERE'S TO A SAFE SWITCH!

Driven by a future-forward approach, Bajaj brings you a robust range of switchgear solutions. Engineered with a strong focus on safety and reliability, Bajaj switchgear ensures a seamless, secure power distribution for homes and businesses alike. Thoughtfully designed for the unique electrical safety requirements of Indian households, our switchgear range delivers the dependable protection everyone deserves.

PRESENTING **BAJAJ SECURA**

Small devices,
big protection.

Switchgear is the unseen system of safety devices that manages, protects, and controls a home's entire electrical flow. It's a smart team of MCBs, RCCBs, and Isolators, each guarding against faults, shocks, surges, and fires.

Hidden behind the walls, it keeps the family safe and appliances running without a hitch. With Bajaj Secura, homeowners get trusted, real-world protection and peace of mind, every single day.

So, they can focus on living, while we handle the safety.

Miniature Circuit Breaker (MCB): The Appliance & Wiring Protector

Think of an MCB as a home's smart power bouncer. It stops excess electricity before it can harm the appliances or wiring.

A circuit breaker is an automatically operated electrical switch designed to protect an electrical circuit from damage caused by the overload of electricity or short circuits. Its function is to detect a fault condition and, by interrupting continuity, to immediately discontinue electrical flow. The overload protection is achieved by the heat generated inside the magnetic coil, which activates the bi-metallic disc and separates the contact through trip mechanism. So, in case the overload hits the danger-level, the MCB promptly opens the contacts and cuts off the power supply, hence, protecting your prized household appliances.

MINIATURE CIRCUIT BREAKER (MCB)

Features & Benefits

Fast Tripping Mechanism	Quick protection against overloads and short circuits.
Shock proof terminal	All terminals are shock proof.
Fire Retardant Body	Built with fire retardant body, that help to prevent any product burning. Additional air vents are provided for effective air circulation resulting in increased durability.
Current Limiting Design	Less let through energy under any fault condition by fast contact isolation and quick arc quenching reduces stress on connected load/cables.
Easy Din Rail Mounting	Compatible with both +/- head screw driver for easy mounting and firm seating on DIN Rail.
Low Watt Loss & Energy Saving(Low Power Consumption)	Cost effective and energy saving through less Watt loss over it's whole life cycle.
IP 20	Comes with IP 20 degree protection.

Energy Efficiency (Average 30%)

Rated Current	06A	10A	16A	20A	25A	32A	40A	50A	63A

MINIATURE CIRCUIT BREAKER (MCB)

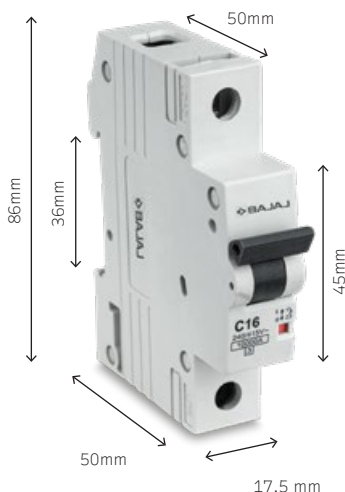

MINIATURE CIRCUIT BREAKER (MCB)

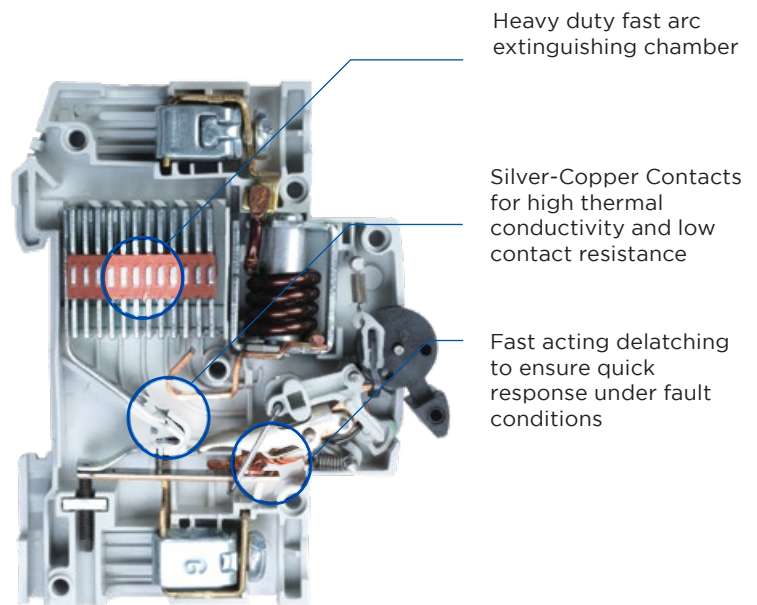

Highlights

- Protects against overloads & short circuits.
- Short Circuit breaking capacity 10 kA.
- Low watt-loss and energy saving.
- Rapid closing mechanism.
- Easy to operate & replace.
- Low-temperature rise.
- Higher operational endurance.
- Finger proof terminal protecting against accidental contact with live part.
- Clear indication of the operational status of device.
- Housing made of moulded flame retardant thermoplastic material.
- Consistency in tripping characteristics.
- Mid Trip Function in center knob MCB.

Dimensions

Built for Long Life & Safety

MINIATURE CIRCUIT BREAKER (MCB)

Specifications

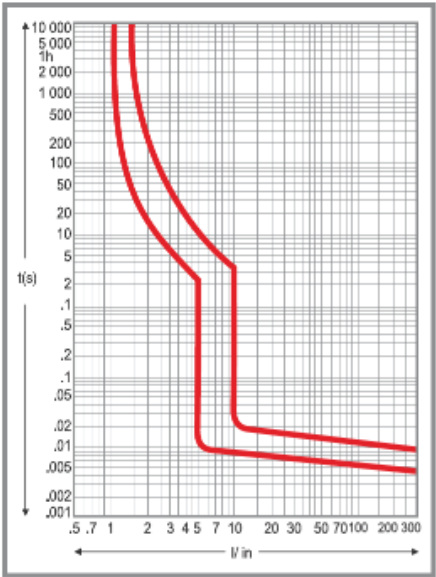

Parameter	Specification
Standard Conformity	IS/ IEC 60898-1:2015
Tripping Characteristics	C Curve
Knob Type	Top Knob & Center Knob
Rated Current (In)	6A to 63A
Rated Voltage AC (Ue)	240/415V
Rated Frequency (Hz)	50 / 60 Hz
No. of Poles (Execution)	SP, SPN, DP, TP, TPN & FP
Rated Short Circuit Breaking Capacity	10kA
Magnetic Release Setting	C Curve (5-10) In
Rated Impulse Voltage (Uimp)	4kV
Electrical / Mechanical Life	4000 Cycles
Dielectric Strength (kV)	2.5kV
Rated Insulation Voltage (Ui)	660V
Mounting	Clip on Din Rail
Degree of Protection	IP 20
Ambient Reference Temperature (Operative)	-5°C to +55°C
Tightening Torque	2 N·m
Terminal Capacity (Max)	35 Sq. mm
Installation Position	Vertical / Horizontal
Air Vent	Available
Body & Cover	PA 6, GF & FR grade, Thermoplastics Material
On Off Indicator	Red - On Green - Off
Bi-Connect	Choice to use Busbar or cable in the same terminal to provide reliable termination

MINIATURE CIRCUIT BREAKER (MCB)

Temperature Derating

In certain situations, where ambient temperature is higher than the regulatory reference temperature of 30°C, the circuit breakers may be subjected to untimely tripping, i.e. opening when not required, since the increase in temperature is interpreted as a current surge. Ambient temperature, as a matter of fact, affects the initial deformation of the bimetal. At a temperature above 30°C the thermal release trips faster, behaving like a relay with a lower nominal current. It is therefore imperative to take into account nominal current derating if the circuit breaker is installed in an ambient temperature above 30°C. The table gives the max. operating current referring to the different temperatures.

C Characteristic

Temperature						
In (A)	25°C	30°C	35°C	40°C	45°C	50°C
2	2.04	2	1.96	1.9	1.86	1.82
6	6.24	6	5.82	5.52	5.28	4.98
10	10.4	10	9.7	9.2	8.8	8.3
16	16.5	16	15.5	15	14.4	14.1
20	20.6	20	19.4	18.8	18	17.6
25	25.8	25	24.3	23.5	22.5	22
32	33	32	31.04	30.1	28.8	28.2
40	41.2	40	38.8	37.6	36	35.2
63	64.89	63	61.79	60	58	56.07

Type	Application	Thermal Test Current	Tripping Time (In ≤63A)	Electro Magnetic Test Current	Tripping Time (t)
		Low	High		
B	Lighting & Distribution with no surge Current	1.13 × In	1.45 × In	>1 hour / <1 hour	3 × In / 5 × In
C	Inductive Load with surge Current	1.13 × In	1.45 × In	>1 hour / <1 hour	5 × In / 10 × In

ISOLATOR (ISO)

An electrical isolator, also known as a disconnect switch, is a manually operated mechanical switch that physically separates a circuit from its power source for safety purposes. It's used to isolate a section of an electrical circuit during maintenance or repairs to ensure no power is flowing through that section.

- Can be used safely as Incomer
- Heavy duty frame size
- Silver alloy contacts for weld free operations
- Easy to operate & replace.
- Finger proof terminal protecting against accidental contact with live part
- Clear indication of the operational status of device
- Moulded flame retardant thermoplastic material

Parameter	Specification
Model / Brand	Center Knob
Rated Current (In)	40A, 63A & 100A

RESIDUAL CURRENT CIRCUIT BREAKER (RCCB)

RESIDUAL CURRENT CIRCUIT BREAKER (RCCB)

RCCB, Residual Current Circuit Breaker. It is an electrical wiring device whose function is to disconnect the circuit when it detects currents leaking to the earth wire.

It also gives protection against electric shock or electrocution caused by direct contacts. RCCB is particularly useful in situations where there is a sudden earth fault occurring in the circuit. e.g. A person accidentally comes in contact with an open live wire in the circuit. In such a situation, in absence of an RCCB in the circuit, an earth fault may occur and the person is at the risk of receiving an electrical shock.

However, if the same circuit is protected with RCCB, it will trip the circuit in fraction of a second thus preventing the person from receiving an electrical shock.

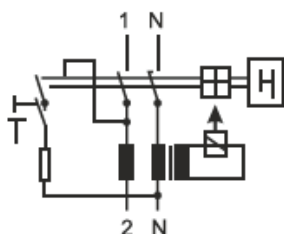

Therefore, it is a good and safe practice to install RCCB in your electrical circuit. A person can feel prickling sensations when he contacts with 10 mA of current. If he gets contact with 30 mA of current, he will face muscle contraction that might lead to respiratory paralysis. And when he gets in touch with above 100 mA, it will lead to electrocution.

Features:

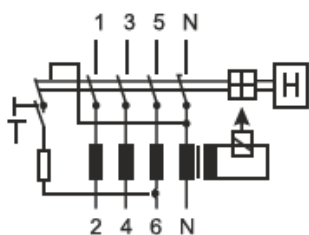

- Protects against earth fault / Leakage current & fulfil isolation function.
- Advance neutral breaks after phases, ensuring complete discharge.
- Elegant appearance & easy to operate & replace.
- Low-temperature rise
- Finger proof terminal protecting (IP20) against accidental contact with live part
- Clear indication of the operational status of device
- Housing made of moulded flame retardant thermoplastic material.

CHANGEOVER SWITCH (COS)

A changeover switch is used during an outage. It is designed to transfer electricity from the commercial power grid to a local generator. Therefore, when the end user is experiencing a power cut, the generator from the changeover switch will provide power. The changeover process aims for a seamless transition, minimizing downtime and disruptions to connected devices or systems.

Highlights

- Compact size & easy DIN rail mounting
- Front operation with three stable positions I-O-II. Off at middle position
- Vertical & can be mounted with other products like MCB, RCCB & Isolators in Distribution Board
- Double Break Contacts

Product Description	Pole Type	Rated Current	Rated Voltage	SKU Code

MINI MCB WITH ENCLOSURE

BAJAJ SECURA PLUS MCB DP Switch 32A

- Suitable for positive isolation
- Energy saving - low watt loss
- Long life due to copper-silver contacts
- Enhanced safety using high quality fire retardant material
- Heat dissipating channel for superior cooling
- Easy to operate & install
- Overload & short circuit protection
- LED indicator of supply
- IP 20 protection
- ISI marked MCB

Rated Short Circuit Capacity:	3kA
Tripping Characteristic:	"C" Curve
Rated Voltage:	240V / 415V ~ 50Hz
Pole Type:	DP
Rated Current:	32A
SKU Code:	870155

MODULAR AC BOX

BAJAJ SECURA MCB Protected Modular AC Box SP 32A

- Elegant white colour to suit every interior
- MCB protection against overload & short circuit
- Suitable for protection of home appliances like ACs, LED TV's, & Geyser etc.
- Heavy duty brass terminal for a cooler running & longer life
- Well-designed plug top "hand gripping", for better fitting and removal
- Robust & strong - made up of corrosion/heat & impact resistant
- Polycarbonate FR grade material

Rated Short Circuit Capacity:	3kA
Tripping Characteristic:	"C" Curve
Rated Voltage:	240V / 415V ~ 50Hz
Pole Type:	DP
Rated Current:	32A
SKU Code:	870156

DISTRIBUTION BOARDS METAL (DB)

Highlights

Mode of High-Quality Virgin Sheets:

- Anti-rust conditioning through 9-tank pre-treatment process. CRCA Grade D Steel.

Safety Standards:

- Detachable gland plate with different size of knockouts. Removable gland plates at the top and bottom of the DB facilitate easy entry and exit of the cable. Thus, one can remove the entire plate from incoming & outgoing terminals.

Ample Space for Wiring:

- This ensures proper distribution of neutral and earth wire.
- Suitable for flush mounting and surface mounting:
- Mounting key hole-every DB is provided with a key hole as an option for surface mounting.

Pozidriv Screws for Easy Removal

- Identification Labels are Provided
- Front Plate Stud:
 - Front plate stud is provided for the easy lifting of the front plate.

Embossed Earthing Identification:

- Clear earthing markings for easy location. DBs are equipped with a stainless steel screw that prevents rusting of the surface.

Door Earthing:

- Door earthing makes the entire DB totally shockproof.

DISTRIBUTION BOARDS ACRYLIC

Highlights

- **Internal sliding knob:** Aesthetically appealing with curves and locking. Colours are matched, as per requirement.
- **Visual anti-inserting facility:** Aids in identifying the box inserting level in the wall.
- **Ample space:** Ample space for wiring is provided to ensure proper distribution of neutral & earth wires.
- **Embossed earthing identification:** Clear earthing marking for ease of installation. DBs are equipped with a stainless steel screw that prevents rusting of the surface.
- **Door & shield independent:** 3-piece concept for ease of maintenance, wherein instead of removing door assembly (Inner & Outer), only the intermediate plate needs to be removed for the purpose of maintenance, without spoiling the alignment & associated plastering/paint work.
- **Identification level and blank plate:** Identification level and blank plates will be provided for the circuit.
- **Front plate studs:** Front plates studs are provided for easy lifting of the front plate.

This image shows a blank sheet of white paper designed for writing. It features a series of evenly spaced horizontal blue lines across its entire width. A single vertical red line runs down the left side of the page, creating a narrow margin. The word "NOTES" is printed in a bold, dark blue font at the top left corner, positioned above the first few lines of the page.
